DETAILED ACTION

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Specification

2. The disclosure is objected to because of the following informalities: ***the component (32) in the drawing is not disclosed in the specification.*** Appropriate correction is required.

Allowable Subject Matter

3. Claims 1-5 are allowed.

Reasons for Allowance

4. The following is an examiner's statement of reasons for allowance:

The prior art fails to disclose or render obvious the claimed combination including at least two electronic units that ensure a partitioning so as to provide a basic functionality of the control device, wherein:

(a) the first electronic unit includes: a voltage supply having different output voltages; at least one transducer supply; a monitoring module; a driver for bi-directional serial interfaces; a

CAN driver; a primary relay control; a primary relay output stage; a serial peripheral interface; and a stop/wake-up counter, and

(b) the second electronic unit includes: a power output stage; at least one low-level signal output stage; and a voltage monitor.

Conclusion

5. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The copies of U.S. Patent are not provided.

Allen et al (US 6877114); Hawig et al (US 6799101); McKee et al (US 6411880); and Matt et al (US 5771474).
